

Requirements document

To edit this file => [EDIT](#)

Functional requirements

As an authenticated user/student can:

1. Add a new question.
2. Answer an existing question.
3. Like(thumbs up) a question.
4. Add a question to his favorites list.
5. Follow tags. (Like this: [Follow tags example](#))
6. Filter questions by:
 - a. Organization.
 - b. Department.
 - c. Term.
 - d. Course.
 - e. Date added. (Day, week, month ...)
7. Search questions.
8. Follow other users/students.
9. Save answers.
10. Report spamming question/Answer.

Push notifications to user when someone answer to his question.

As a **non** authenticated user can:

1. Show, filter and search questions.
2. Show leaderboard.

Non functional requirements

To avoid spam and unverified users (who might enter to joke or smth like that :)) :

- Question is removed after n numbers of reports.
- Email/Phone must be verified before adding a question/answer.
- Validate user's data. (Details are to be explained later)
